Professional Experience

Karl has a passion for delivering integrated and elegant design solutions for large, complex projects and creating vital and cultural places using collaborative design processes. He has demonstrated capability in client and stakeholder engagement, concept and schematic design and detailed design working on urban visioning and master planning, mixed use developments, civic projects, hospitality and tourism, office, retail, and aviation and transport architecture.

Prior to joining Architectus in 2014 Karl was based in China for five years where he worked on multiple large and complex projects throughout Asia as Design Director and Studio Manager of Woodhead's Shanghai office. He went on to become an owner and Executive Director of Woodhead, in charge of the Singapore Studio and Asia business before the company was sold in 2014. He continues to deliver high quality design processes and solutions on a diverse range of projects across Australia and Asia.

Significant Projects

Brisbane Airport Seamless Transfer

Planning and design for seamless transfer of passengers and baggage between the terminals at Brisbane Airport. Redefining the passenger journey experience for transferring passengers and repositioning the rail system connecting the terminals to become the primary transfer service.

Soekarno Hatta International Airport T3, Jakarta, Indonesia (Woodhead).
