Professional Experience

Allan is a Senior Design Architect with a depth of conceptual design experience across all sectors. He has particular skills and experience delivering in master planning, urban design and architectural design projects.

Allan has a proven track record achieving on-time project delivery for a broad client base and across all principle regions in Queensland. He brings a practical and future driven approach to delivering climatic responsive design that is legible and focussed on project requirements.

Through his active involvement within the RAIQ Queensland Chapter Council and National Committee for CPD from 2002-2007, Allan has helped formulate current policy and content for the Architectural industry.
