Professional Experience

Shaun has a wealth of design experience across projects of varying scales and types with emphasis on residential, commercial, hospitality and retail architecture. He has held senior roles with many of Australia's most renowned architecture practices including Principal at HASSELL, and Associate Director at Elenberg Fraser and Bates Smart where he has overseen landmark developments locally and internationally.

Shaun's portfolio of work covers precinct master plans and driving conceptual design strategies to the successful completion of high-rise towers, mixed-use developments, town houses, student accommodation and hotels for both private clients and the public sector.

With a strong commercial background in the coordination between design intent and the implementation processes of statutory planning and construction, enables Shaun to create design focused holistic project solutions.
