Professional Experience

With 30 years of experience, Ray is actively involved in strategy, design and oversight of projects; working across multiple teams in mixed-use commercial, residential, education and cultural sectors. Sensitive to how buildings relate to their surroundings, Ray understands the big-picture urban context and believes the best design solutions are underpinned by rigorous analysis and supported by open and collaborative client engagement. He advocates for design that is led by end-user perspectives to achieve commercial viability, efficiency and civic value.

Ray has formed successful collaborative relationships with many international architects; most notably with Christoph Ingenhoven to co-design the multi award-winning 1 Bligh Street and residential tower 505 George Street.

Significant Projects

505 George Street, Sydney. *Design competition winner.* 80-storey signature mixed use tower with high quality residential, retail, community facilities, childcare and hotel. 65 000 m², \$1b.
